Description:

For non-majors/mixed biology courses.

Note: You are purchasing a standalone product.

Build a flexible non-majors biology course with science literacy at its core.

Eric Simon's Biology: The Core combines a succinct, beautifully illustrated 12-chapter textbook with

engaging MasteringBiology assignment options. The Core delivers a uniquely flexible teaching and learning package that supports Active Learning or “Flipped Classroom” teaching techniques, and an emphasis on current issues that relate to basic biological concepts.

The Second Edition text and MasteringBiology assignment options further revolutionize teaching in and out of the classroom with a greater emphasis on the nature of science and dozens of new opportunities for students to practice basic science literacy skills. The Core’s concise modules continue to focus students’ attention on the most important concepts, combining dynamic figures and illustrations with supporting narrative as the primary source of instruction to create a more engaging and accessible learning experience for students.

Note: You are purchasing a standalone product; MasteringBiology does not come packaged with this content. Students, if interested in purchasing this title with MasteringBiology, ask your instructor for the correct package ISBN and Course ID. Instructors, contact your Pearson representative for more information.

If you would like to purchase both the physical text and MasteringBiology, search for:

013416699X / 9780134166995 The Core Plus MasteringBiology with eText -- Access Card Package, 2/e
